

PRIYABRATA DUTTA

Full Stack Developer / React / Next.js / Node.js / AWS / LLM/ Technical Lead

+91 98324 65858 | priyabrata.dutta.slg@gmail.com | Bangalore, India

PROFESSIONAL SUMMARY

Full Stack Developer with 10+ years in IT and 5+ years of specialized experience building end-to-end web applications with React, Next.js, Node.js, Express, and AWS. Currently a Technical Lead managing a cross-functional development team, with a track record of designing scalable architectures, improving application performance, and translating client business goals into secure, measurable technical outcomes. Actively expanding expertise in Generative AI integration and Agentic AI workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive / Mobile-First Design, SSR / SSG / CSR

Backend: Node.js, Express, FastAPI, Python, REST API design, Authentication (JWT / OAuth), Payment Gateway Integration (Razorpay), Prisma ORM

Database: MySQL, PostgreSQL, Redis - schema design, query optimization, indexing, connection pooling

Cloud & DevOps: AWS (EC2, S3, CloudFront, Lambda), Docker, Kubernetes, CI/CD Pipelines, Git / GitHub

AI & Emerging: Generative AI integration, LLM fundamentals, OpenAI API, LangChain (Beginner), ChromaDB, RAG pipelines, Prompt Engineering & Tooling, Agentic AI workflows

Leadership: Team Leadership, Agile / Scrum, Code Review & Mentoring, Project Management, Client Communication

PROFESSIONAL EXPERIENCE

Technical Lead / Full Stack Developer | Feb 2022 - Present

Appadd India (P) Ltd, Bangalore

Architect and deliver scalable web applications in React.js, Next.js, Node.js, and Express - 100+ client projects shipped across healthcare, legal, and B2B domains with 99.7% uptime over 3+ years.

Design 35+ REST APIs handling 10K+ daily requests - implemented JWT authentication, role-based access control, and Razorpay/Cashfree payment gateway integrations processing 15 Lakh+ monthly transaction volume.

Reduced average page load from 4.2s to 1.1s (74% improvement) through code-splitting, lazy loading, and CloudFront caching - lifted Core Web Vitals scores from 45 to 92, directly improving organic search rankings for 8 client domains.

Built multi-tenant Clinic Appointment SaaS from scratch - online booking, OTP-based auth, doctor schedule management, automated patient reminders - handling 500+ bookings/month. Solved concurrent booking conflicts with optimistic locking and DB-level unique constraints.

Shipped B2B e-commerce platform managing 5,000+ SKUs - bulk ordering, tiered pricing engine, Razorpay integration with idempotency keys. Optimized catalog search to less than 40ms response time using MySQL full-text search and Redis cache.

Migrated 15+ client applications from shared hosting to AWS infrastructure (EC2, S3, CloudFront, Lambda) - cut hosting costs by 40% while improving uptime from 95% to 99.7%.

Established CI/CD pipelines (GitHub Actions and Docker) reducing deployment time from 45 minutes manual to 8 minutes automated - eliminated 100% of manual deployment errors.

Grew engineering team from 2 to 5+ developers - instituted mandatory code reviews (500+ PRs reviewed), PR templates, and engineering standards that reduced production bug rate by 60%.

Primary technical consultant to 15+ active clients - conduct discovery sessions, produce architecture documents, define project timelines. Client retention rate: 90%+ | Average engagement length: 8+ months.

Currently building an LLM-powered GenAI assistant (FastAPI + LangChain + ChromaDB) that automates client report generation - cut monthly reporting time from 3 hours to 10 minutes per client.

Freelance Full Stack Developer | 2021 - 2022

GraphicxIT, Siliguri

Delivered 20+ custom web applications for clients across 4 countries (India, USA, UAE, UK) using React.js, PHP, and Laravel - 100% on-time delivery rate, zero post-launch critical bugs.

Sole engineer on a Laravel web application for a government body - handling 5K+ registered users, document management, secure member workflows. Designed the entire database schema (25+ tables) and built complete auth system independently.

Achieved Google PageSpeed scores of 90+ across all client sites through responsive design, image optimization, and performance tuning - contributing to 30% average increase in organic traffic within 3 months of launch.

Designed and optimized MySQL schemas reducing average query response time by 65% - one client's dashboard load dropped from 8s to 2.8s.

Automated 10+ client workflows using Zapier and custom REST API integrations - saving 15+ hours per month of manual data entry per client.

Technical Resource / Web Developer | 2019 - 2021

Uttarbanga Sambad, Siliguri - one of North Bengal's leading news media organizations

Built and maintained a high-traffic news portal serving 100K+ monthly readers across web and mobile - engineered for real-time publishing with sub-second page loads during breaking news traffic spikes.

Led a 20-member cross-functional team across development, content operations, and digital marketing - established daily editorial-tech sync workflow that reduced content publishing bottlenecks by 50%.

Drove complete digital transformation - migrated from static HTML publishing to dynamic CMS architecture, increasing content output from 20 to 60+ articles per day (3x improvement).

Hardened web security (WAF rules, SSL enforcement, DDoS mitigation) and optimized NGINX and MySQL performance - achieved 99.5% uptime and reduced page load by 50%.

Built technical infrastructure for Facebook Live broadcasts reaching 10K+ concurrent viewers - set up encoding, streaming pipeline, and automated archival workflow.

Launched ad monetization platform (Google AdSense + direct ad placements) generating 2 Lakh+ per month in digital advertising revenue.

Technical Assistant / Web Developer | 2010 - 2019

Surendra Institute of Engineering & Management (SIEM), Siliguri

Conducted programming labs for 500+ students annually in C, C++, Java, VB.NET, and Data Structures & Algorithms - consistently rated among top instructors by student feedback surveys.

Designed and executed data-driven admission promotion strategy - achieved 10% increase in inquiry leads and 6% rise in confirmed admissions (2015-16), contributing to 15 Lakh+ additional institutional revenue.

Built the college website from scratch and managed digital marketing campaigns (Google Ads + Facebook) driving 5K+ monthly visitors - transformed the website into the #1 admission inquiry channel, generating 40%+ of all new student inquiries.

Supervised 50+ final-year student projects across software design, web development, and database management - mentored students on architecture decisions, code quality, and project presentation skills.

Organized and delivered 10+ technical workshops on emerging web technologies for students and faculty - introduced the department to modern frameworks (React, Node.js) that were later adopted into the curriculum.

KEY PROJECTS

Clinic Appointment SaaS Platform (Live)

Multi-tenant appointment scheduling SaaS for clinics and hospitals - online booking, doctor schedule management, OTP-based authentication, role-based access, and automated patient notifications. Built with React, Node.js, and MySQL; hardened via dedicated security audit and end-to-end test suite.

B2B E-commerce Platform (5,000+ SKUs) (Live)

Full-featured B2B e-commerce application managing 5,000+ products - bulk ordering, tiered pricing, secure authentication, and Razorpay payment integration. Optimized catalog search and listing performance for large product volumes with responsive, mobile-first storefront.

Generative AI Assistant Platform (In Development)

Building an LLM-powered assistant that automates content generation and business workflows - prompt pipelines, API-based model integration, and context-aware responses. Stack: React, Node.js, FastAPI, and LLM APIs.

Sales & Marketing CRM with Predictive Analytics (In Progress)

Designing a company CRM for sales and marketing teams - lead capture, pipeline management, and campaign tracking with predictive lead scoring to prioritize high-conversion prospects. Stack: React, Node.js, Express, MySQL, with AI-driven prediction models.

EDUCATION

Master of Computer Applications (MCA) - 2022

Siliguri Institute of Technology, Siliguri - focus on software engineering, web technologies, and cloud computing

Bachelor of Computer Applications (BCA) - 2011

Sikkim Manipal University

CERTIFICATIONS

Full Stack Development & Product Engineering - PESTO, 2024 | Cloud Computing - NPTEL (IIT Kharagpur), 2022 | AWS Certified Developer - Associate (in progress)
